

RES

Figure 1 displays 16 time-series plots arranged in a 4x4 grid, showing the evolution of various parameters over a 24-hour period. The x-axis for all plots is 'hours' (0 to 24). The y-axes are labeled 1 through 16. The plots show different behaviors: some are flat, some show sharp spikes, some show gradual increases, and some show complex oscillatory patterns. The plots are arranged in a 4x4 grid.
